

EUROPEAN EDUCATIONAL RESEARCH ASSOCIATION

About EERA

Mission Statement

The aim of the 'European Educational Research Association' (EERA) is to further high quality educational research for the benefit of education and society. High quality research not only acknowledges its own context but also recognises wider, transnational contexts with their social, cultural and political similarities and differences.

The association's activities, such as the annual conference, season schools for emerging researchers and publishing, build on and promote free and open dialogue and critical discussion and take a comprehensive and interdisciplinary approach to theory, methods and research ethics.

About EERA

EERA membership is made up of more than 35 national and regional Educational Research Associations from all parts of Europe. It is governed by the Council and the Executive Committee. The academic work is organised in thematic networks. From 1994 to 2008 EERA was constituted as a non-profit organisation under British Law and was based in Scotland. Since 2008 EERA has been based in Berlin, Germany and is constituted as a "Verein" (i.e. non-profit organisation under German Law)

EERA is dependent on the participation of the national associations to take forward its mission of promoting educational research in Europe and of fostering cooperation between associations of educational researchers.

How EERA started

EERA was founded in June 1994 as a result of discussions among many national educational research associations and several major research institutes throughout Europe which identified the need for a European association to foster the exchange of ideas amongst European researchers, promote collaboration in research, improve research quality and offer independent advice on educational research to European policy-makers, administrators and practitioners.

EERA was therefore founded as a learned society specifically for the purposes of:

- encouraging collaboration amongst educational researchers in Europe
- promoting communication between educational researchers and international governmental organisations such as the EU, Council of Europe, OECD and UNESCO
- improving communication amongst educational research associations and institutes within Europe
- disseminating the findings of educational research and highlighting their contribution to policy and practice
