

EERA has a new network! NW 33. Gender and Education

EERA is pleased to present its newest network, NW 33. Gender and Education. The main objective of the Network is to strengthen the collaboration and enhance sharing of the research experience across different disciplines in order to improve the quality of the research and to acquire a transnational, more holistic approach and comprehensive view on gender and gender equality in education within Europe and globally.

We believe it is time gender and education became an autonomous network within EERA. Moreover, the importance of gender as a topic of research in the scope of education sciences domain needs to be thus recognized. Knowledge produced by continuous, high class research on gender issues is needed also for successful evidence based educational policy making.

Please find more information on NW. 33 Gender and Education [here](#).
